EDUCATION

Bachelor of Mathematics
Málaga University, Spain
Expected 2027

Relevant Coursework:

- Probability & Statistics
- Linear Algebra
- Optimization
- Stochastic Processes

SKILLS

Programming

- Python
- SQL (Basic)
- Git / GitHub

Libraries

- Pandas
- NumPy
- Matplotlib
- Scikit-learn (basic)
- Neo4j

Tools

- Jupyter Notebook

LANGUAGES

Spanish – Native
English
(actively developing)

CERTIFICATIONS

Data Science Career Track
DataCamp | 2026
In Progress

PROFESSIONAL SUMMARY

Final-year Mathematics student with a strong foundation in statistics, optimization, and stochastic processes, specializing in Data Science and Machine Learning. Applying Python, Pandas, and SQL through independent, project-based learning to develop practical analytical solutions. Focused on bridging mathematical modeling with real-world decision-making.

PERSONAL PROJECTS

Data Analysis Practice Repository

2025 – Present

- Developed data analysis exercises and case studies through DataCamp coursework and self-study
- Applied data cleaning, EDA, and visualization using Python, Pandas, and NumPy
- Documented findings in structured notebooks hosted on GitHub

Machine Learning Projects

2026 – Present

- Building practical projects focused on data analysis, machine learning, and predictive modeling using Python and Scikit-learn
- Exploring supervised learning techniques including regression and classification on real-world datasets

KAI – Educational AI Prototype

2024

- Collaborated in the design and early prototyping of an AI-based educational assistant for personalized learning
- Validated concept through the Santander X Explorer entrepreneurship programme

WORK EXPERIENCE

Private Mathematics Tutor

Sep 2023 – Mar 2026

Málaga, Spain

- Delivered individualized mathematics lessons to primary and secondary students, adapting explanations to diverse learning styles
- Developed structured lesson plans and tracked student progress — building habits of clear communication and methodical problem-solving

Hospitality Assistant / Waiter

Jun 2020 – Aug 2024

Summer work

- Collaborated in a fast-paced team environment, developing strong organizational and interpersonal skills
- Managed multiple responsibilities simultaneously under time pressure
